

Hi ,I'm **Chanisa**, A Trainee Engineer.

As a dedicated and passionate Software Engineering student with a keen interest in advancing my knowledge and skills, I am seeking admission into a reputable university to pursue a master's degree in an I.T. related field. I aim to contribute my academic background, practical experience, and problem-solving abilities to excel in the program and make a meaningful impact in the technology industry.

SKILLS

Language and Frameworks

Java Script

Java

HTML/CSS

Angular

JQuery

React/React Native

NodeJS

Database

MySQL

MongoDB

Tools

IntelliJ

VS Code

Figma

Postman

GitHub/Git

EDUCATION

BACHELOR OF ENGINEERING TECHNOLOGY(HONOURS), MECHATRNOICS TECHNOLOGY (2022)

University Of Sri Jayawardhanapura

ICET Certified Master (2023)

ICET -Panadura

JAVA, Java Script, Spring Boot, React, React Native

DIPLOMA IN INFORMATION TECHNOLOGY - DITEC (2013)

E-Soft Metro Campus
Galle

G.C.E Advances Level Examination (2015)

Techonology Stream
Richard Pathirana College Galle

PROJECTS

ClothiFy - E-Commerce Platform App

[Spring, React, MySQL, JWT Authentication, Model Mapper]
 [chanisagithub/ClothiFy_Ecom-Backend](#)

I developed a comprehensive E-Commerce web application that seamlessly integrates cutting-edge technologies to offer an efficient and user-friendly online shopping experience. Leveraging Spring Boot for the backend, React for the frontend, and MySQL for database management, the project showcases my proficiency in full-stack development and software engineering.

Student Management System

[Java, Swing]

 [chanisagithub/StudentManagementSystem](#)

Designed and built a Java-based student management system using Java Swing, facilitating streamlined student information tracking and management.

Point Of Sale System (Standalone)

[Java, JavaFx, MySql]

 [chanisagithub/POS_System_FX](#)

I created a Java-based Point of Sale (POS) standalone app using JavaFX and MySQL, streamlining transactions and inventory management. This project highlights my skills in Java programming, user interface design, and database integration for effective business solutions.

Real- Time Weather Application

[HTML, CSS, JavaScript, BootStrap, Weather API]

 [Chanisaunique/Weather_App_1.0](#)

I designed and built a dynamic real-time weather app using Bootstrap, HTML, CSS, and JavaScript, integrated with a weather API. This app offers live weather updates and forecasts, demonstrating my proficiency in frontend technologies and API integration to create engaging and functional user experiences.
